INITIATIVE

LESSONS LEARNED WORKSHOP

NATIONAL ECOSYSTEM ASSESSMENT INITIATIVE

@UNEP-WCMC

Session 5 Agenda

Acceptance & Use of Assessment Findings

- Part 1 High-level opening remarks
- Part 2 Looking ahead: UNDP's support for post-NEA implementation
- Part 3 Use of assessment findings & policy entry points: UNEP-WCMC
- Part 4 Breakout activity: Use of NEAs through policy entry points
- Part 5 Summary for Policymakers & approving assessments: presentations by Colombia & Vietnam
- Part 6 Panel discussion: opportunities for approving assessments

Opening remarks

Vice Minister Federico Franco

Vice Minister of Environment and Natural Resources
for PAs and Biodiversity at the Dominican Republic

Use of NEA findings

Supporting the integration of NEAs
in decision-making & policy processes

Looking ahead: Supporting 'Use of NEAs' under BES-NET II

Marlyn Omondi

BES-Net / UNDP

BES-Net Post- NEA implementation

NEA Lessons Learned Workshop, 28 July 2021

UN 
environment
programme

a program of Swedish Academic Society

BES-Net Overview

- A unique collaboration between UNDP, UNEP-WCMC and UNESCO
- Support & contribute to the capacity-building work of IPBES, enhancing interaction and coordination among actors in the science, policy and practice sectors
 - ✓ Facilitate triangular dialogues, or **Trialogues**, around IPBES assessment themes
 - ✓ Undertake **National Ecosystem Assessments** to co-generate an up-to-date and robust evidence on BES
 - ✓ Channel catalytic **BES Solution fund** towards tangible, on-the-ground biodiversity solutions
 - ✓ Bring together individuals and institutions with shared objectives of supporting IPBES and ensuring diverse, healthy and resilient ecosystems through **communication and knowledge management**
 - ✓ Engage **indigenous peoples and local communities** in knowledge-sharing and decision-making

BES-Net Overview

- BES-Net Phase I (2016-2021) focus
 - ✓ Dialogues
 - ✓ NEA
 - ✓ Networking
- BES-Net Phase II (2020-2028) focus
 - ✓ Dialogues
 - ✓ NEA
 - ✓ Networking
 - ✓ **BES Solution Fund**
 - ✓ **Indigenous and Local Knowledge (ILK)**

Steps to Post-NEA Implementation

National Ecosystem Assessment

IPBES Guides

THE IPBES
GUIDE ON THE PRODUCTION
OF ASSESSMENTS
CORE VERSION

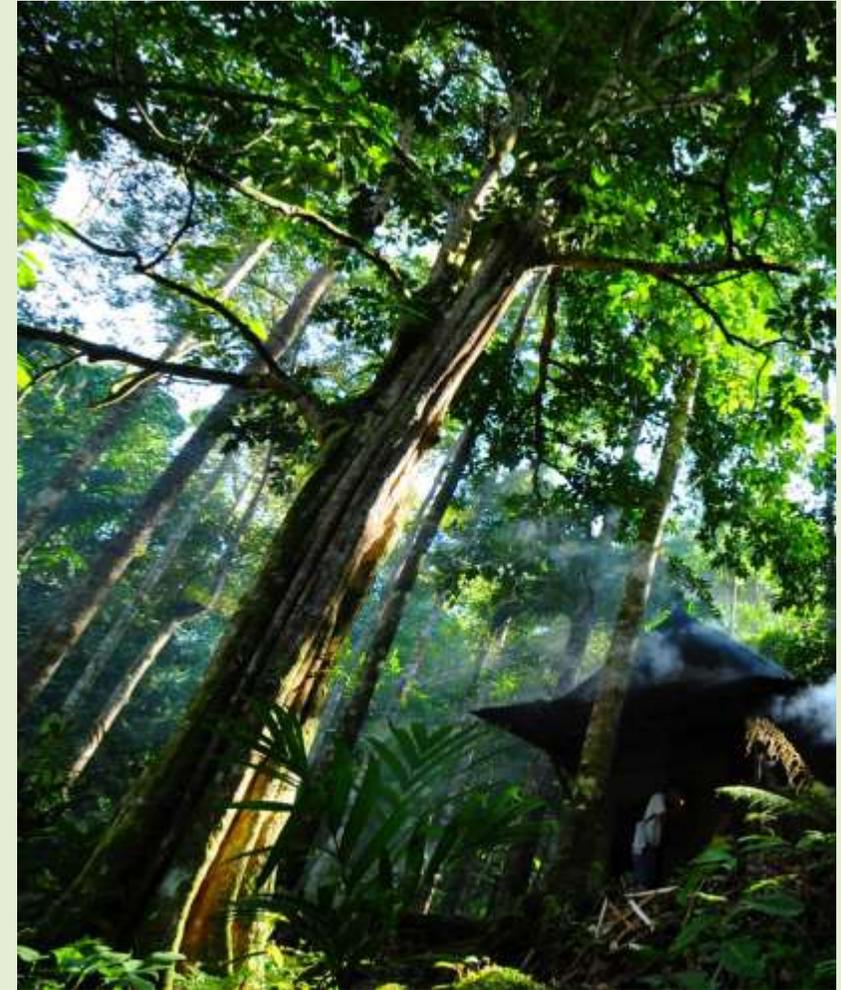

Post-NEA
Uptake Support

BES Solution Fund

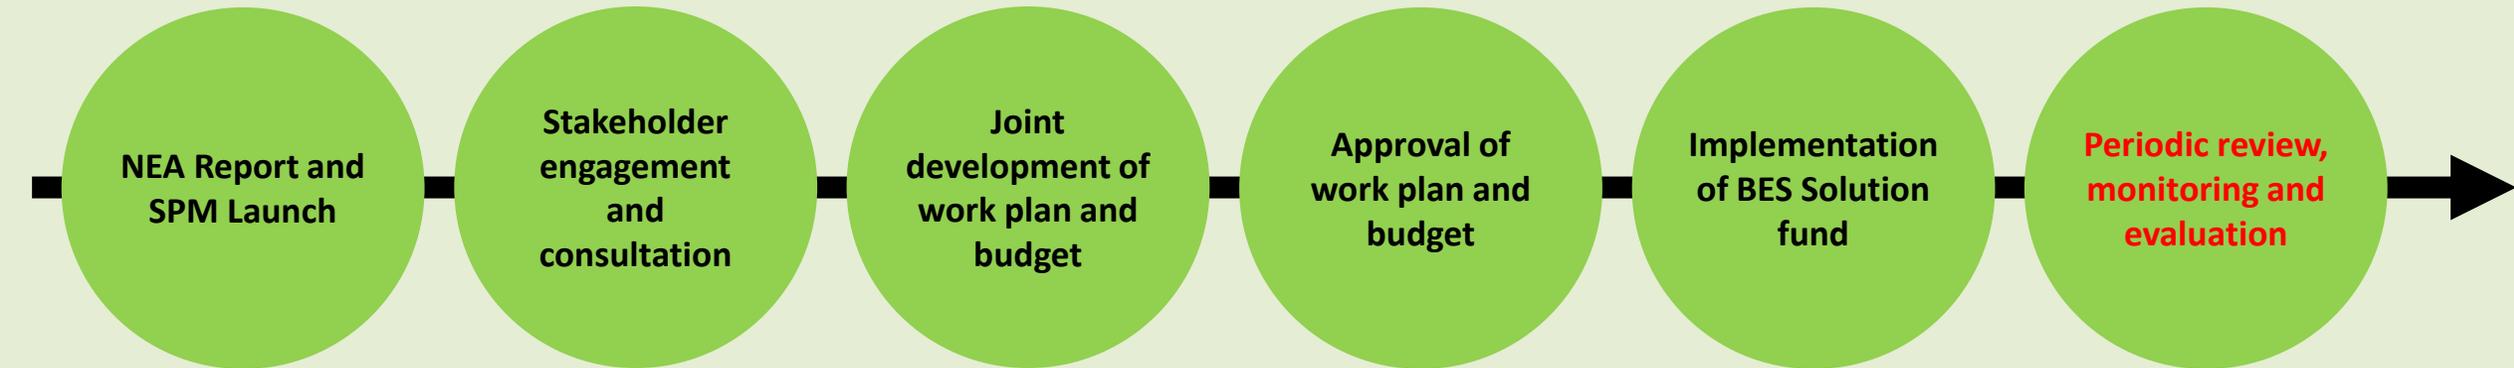

BES Solution Fund

- Catalytic fund to support implementation of the priority NEA recommendations identified
- Aim:
 - ✓ Strengthen science-policy-practice network in the countries **and their contribution to IPBES process**
 - ✓ Accelerate coordinated uptake of **key NEA messages** at national level
- Fund implemented in phases of 2 years each (up to 2028)
- Fund amount: US\$ 320,000 per country

BES Solution Fund

Process

Fund expected to:

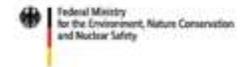

- contribute to and complement related ongoing and up-coming activities in the country
- build on existing policy, institutional and management framework in the country

Thank you

SUPPORTED BY

Opening remarks

Vice Minister Federico Franco

Vice Minister of Environment and Natural Resources
for PAs and Biodiversity at the Dominican Republic

Policy Entry Points

Windows of Opportunity to Support Decision-making

Abisha Mapendembe

UNEP-WCMC

Using NEA findings in Policy

NEA findings should be useful for decision-making & policy processes

This is why the NEA process aims to:

- Develop & answer ‘policy questions’
- Maintain policy relevance
- Evaluate knowledge, identify priorities
- Disseminate Summary for Policymakers (SPM)
- Strengthen science-policy interface

Outline

Policy Entry Points & NEAs

1. NEAs & 'mainstreaming': inclusion in policy
2. What are policy entry points?
3. Different types of policy entry points
4. What outcome/change do you want to achieve through each policy entry point?

Use of NEAs in policy

What is 'mainstreaming'?

“Mainstreaming is the process of **embedding biodiversity & ecosystem services considerations into policies, strategies, and practices** of key actors that **impact or rely on biodiversity, so that it is conserved & sustainably used...**”

Global Environmental Facility, 2016

Mainstreaming NEA findings is **including its knowledge** in the **policies, plans and activities of key sectors** and processes that impact or rely on nature...

Use of NEAs in policy

Levels of integration in policy

1. Conceptual

Written policies & plans account for biodiversity. Documents underpinning national and sectoral policies/plans explicitly or implicitly take biodiversity into account & recognise biodiversity as underpinning elements of human wellbeing

2. Operational

Measures or instruments are identified and in place for biodiversity mainstreaming within national or sector policies

3. Implementation

Measures or instruments to achieve biodiversity mainstreaming are implemented on the ground in actual policy-and decision-making situations (e.g. funding, monitor their effectiveness and adopt changes if needed).

How can your findings support biodiversity integration at each level?

Use of NEAs in policy

Means to support policy processes

- 1. Information instruments**
 - Data, science-policy assessments + evaluations of knowledge (including ILK)
 - Biodiversity indicators, monitoring
 - Mapping, accounting, valuations
- 2. Decision-support instruments**
 - Planning and targeting (e.g. river basin and flood risk management plans)
 - Reporting;
 - Impact assessments, risk assessment and analysis;
- 3. Implementation instruments**
 - Dedicated laws, regulations & standards
 - Spatial instruments: Protected areas & OECMs
 - Public investments
 - Market-based instruments

NEAs & policy entry points

What are 'policy entry points'?

'Policy entry points' are:

- Windows of **opportunity to influence decision-making**
- Across all levels of governance & policy processes
- Relevant to policymakers, key stakeholders or broader public on biodiversity & ecosystems services

NEAs & policy entry points

Levels of policy entry points

National-level	Sectoral	Sub-national
National governments Development agencies	Sectoral ministries Private sector Investment/financial agencies	Local government Local business/industry

NEAs & policy entry points

National-level entry points (examples)

National government:

- National Vision (long-term development plans)
- Five-year national development plans
- National sustainable development strategies
- Sustainable Development Goals
- National budgets & expenditure

Development assistance agencies:

- UN Sustainable Development Cooperation Assistance Framework
- Bilateral Country Assistance Strategies (i.e. USAID, GIZ)

NEAs & policy entry points

Sectoral entry points (examples)

Sectoral ministries

- Sectoral ministries investment plans & strategies
- Sectoral ministries' policies
- Ministry-level budgets & expenditures

Private sector

- Company-wide policies & strategies
- Environmental & social reporting
- Corporate social responsibility plans

Investment/financial agencies

- Investment standards & safeguards
- International financial institutions investments & strategies (World Bank, GEF)

NEAs & policy entry points

Sub-national entry points (examples)

Local governments

- District development plans
- Local / district budgets
- Decentralised sectoral policies
- Indigenous & local governance systems

Local industry & private sector

- Site-level strategies, policies and activities
- Local certification schemes
- Site-management plans
- Site-level monitoring & evaluation

What is your desired policy outcome?

What type of change do you want to achieve through your policy entry point?

Upstream

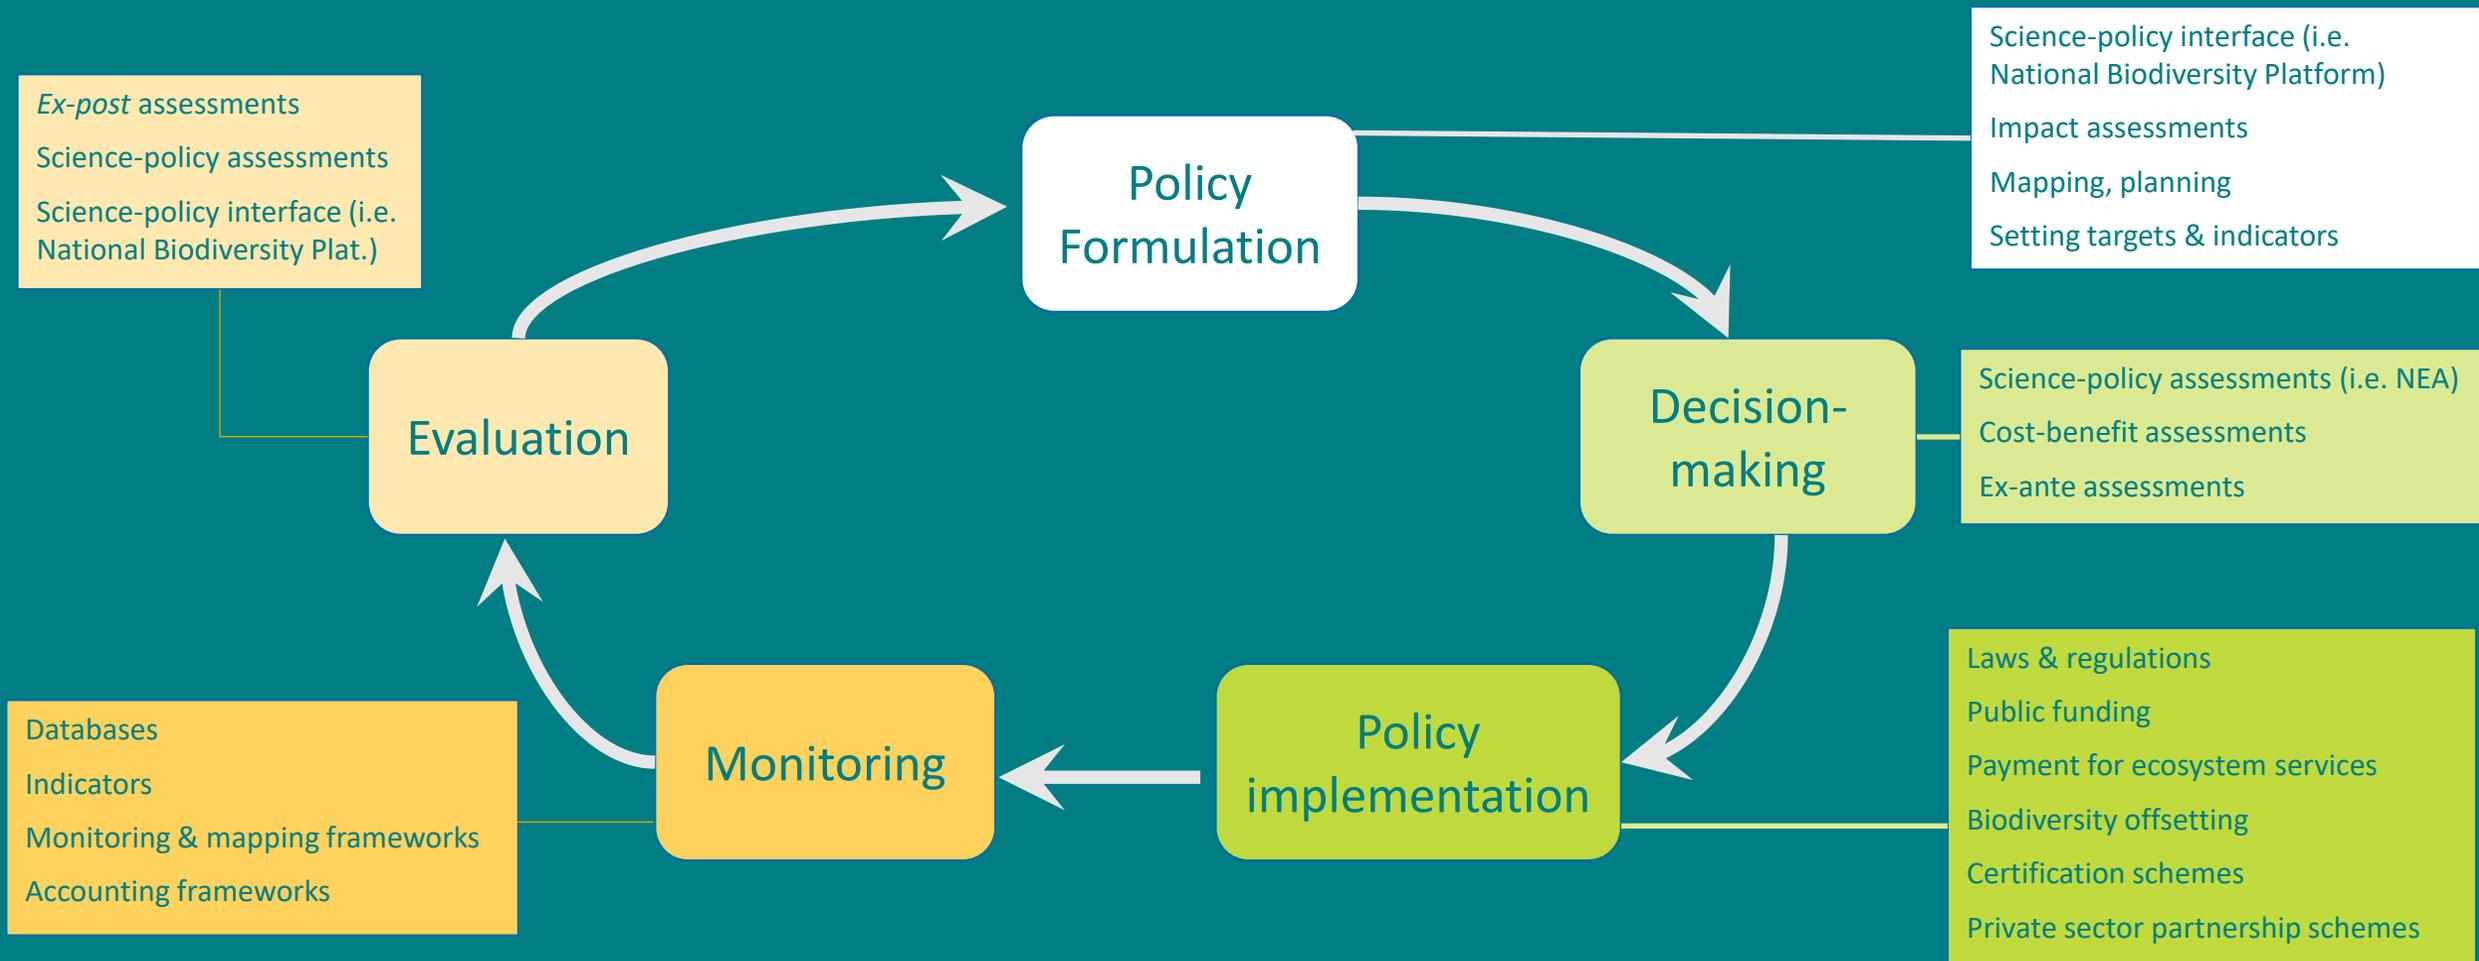

Downstream

- Governance outcomes
 - Policy / political outcomes
 - Planning outcomes
 - Institutional & capacity outcomes
 - Budgets & investments
 - Enabling environments for change
- Implementation of plans & actions on the ground
 - Changes in impact(s) of sectoral practices & activities

	Outcome	
<p data-bbox="351 118 555 154">UPSTREAM</p>  <p data-bbox="326 1260 580 1296">DOWNSTREAM</p>	Governance outcomes	e.g. Improved involvement of directly biodiversity-dependent (sometimes vulnerable) stakeholders
	Policy and political outcomes	e.g. High-level sector, fiscal, development and social policies, constitutions and statements of national vision, include biodiversity considerations, and vice versa
	Plan outcomes:	e.g. Inclusion of biodiversity-poverty linkages in development and poverty reduction strategies and in biodiversity strategies
	Budget outcomes	e.g. evidence of public-private sector resource mobilisation, inclusion of development-biodiversity linkages in national public and sector budgets
	Institutional and capacity outcomes	e.g. strengthened capacity within biodiversity-related institutions to understand development and economic processes and interact in a constructive manner
	Investment outcomes	e.g. Improved domestic resource mobilization for poverty-biodiversity investments or recognition of potential trade-offs in sector investments such as mining
	Behavioural outcomes	e.g. key patterns and processes of production, consumption and waste treatment in sectors and localities are informed by biodiversity and poverty considerations.
	Pro-poor biodiversity and ecosystem management outcomes	e.g. maintenance/restoration/enhancement of pro-poor ecosystem services, such as medicinal, cosmetic or edible plants; healthcare, wild foods, soil fertility; traditional breeds and crop varieties; water purification
	Ultimate (biodiversity and developmental) impacts of these outcomes	e.g. improved productivity and sustainability of use of biodiversity assets and ecosystem services on which the poor depend; protection and management of targeted species populations

Where in the policy cycle do you want to include NEA findings?

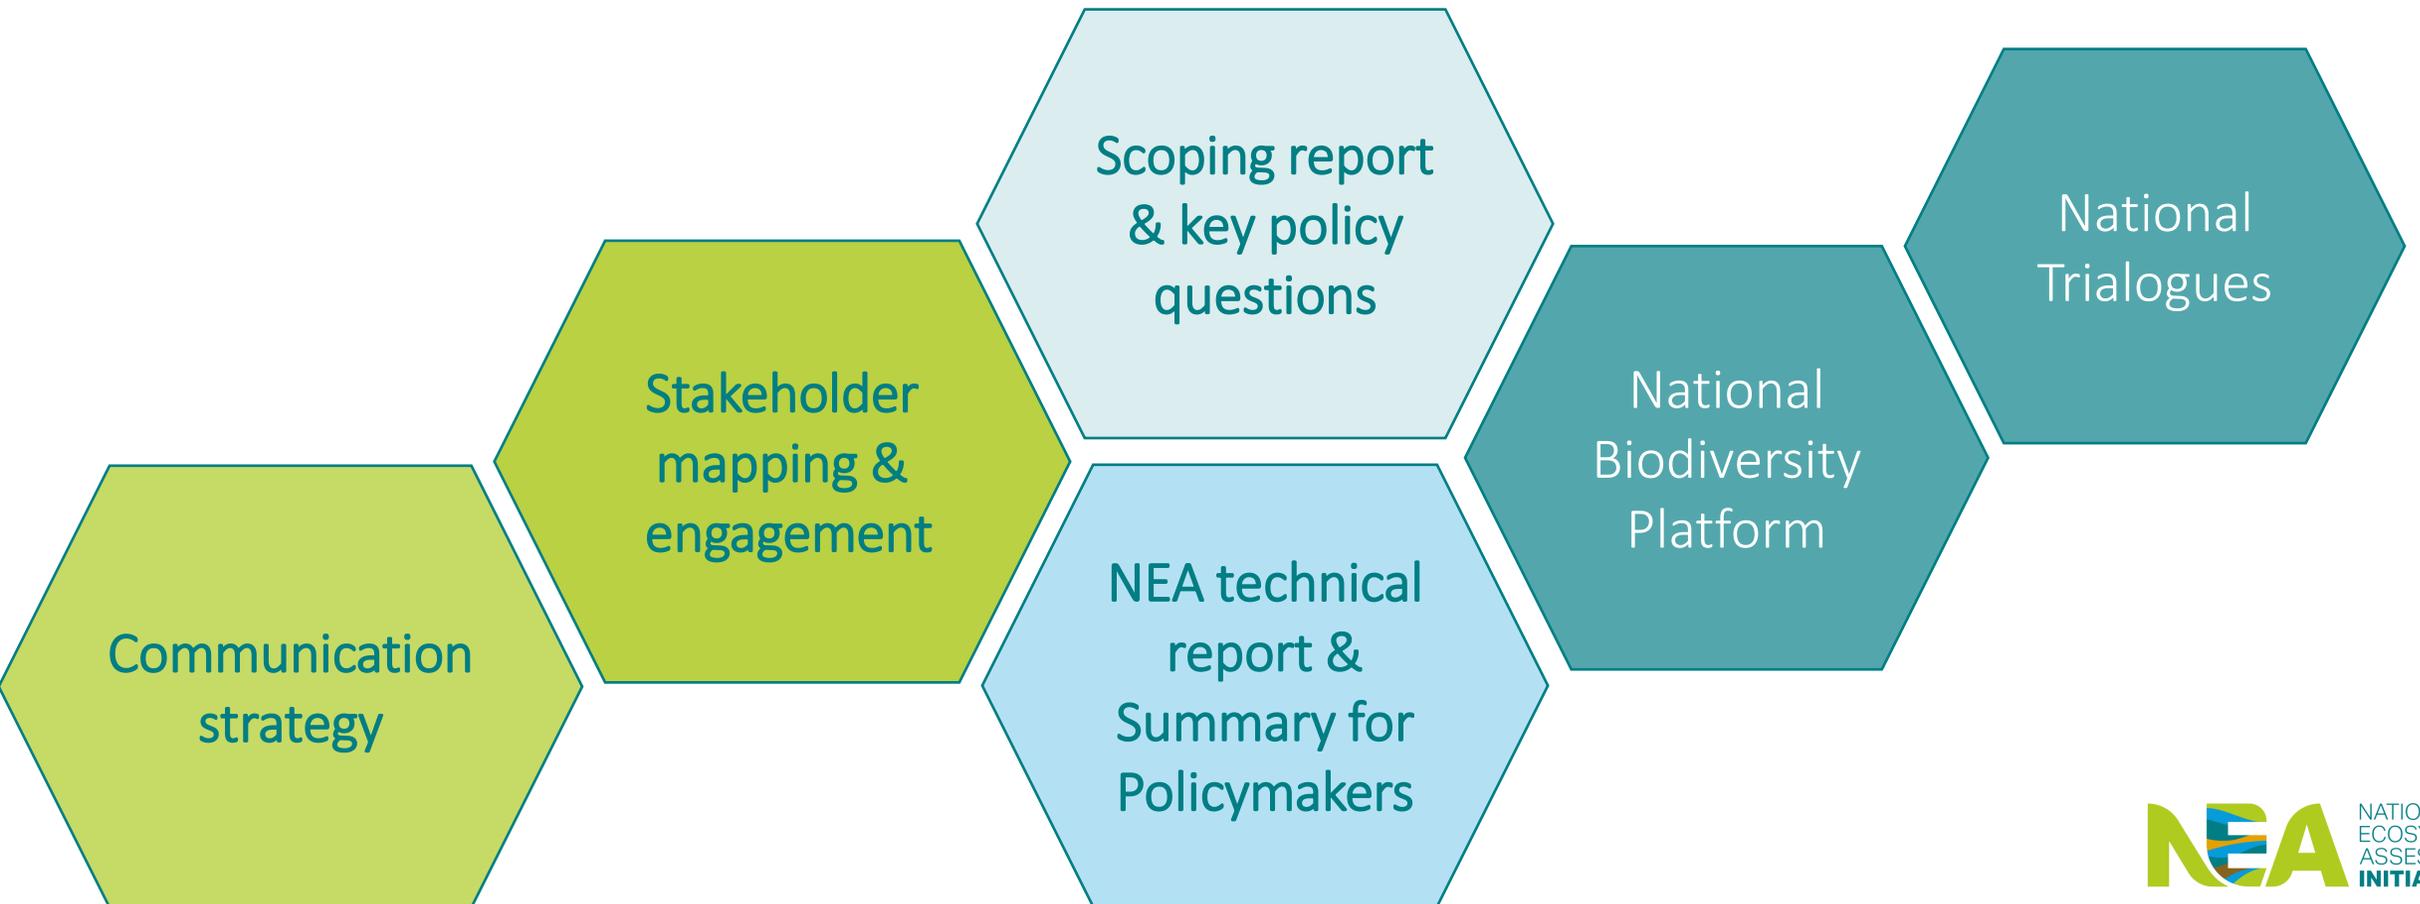

NEAs & policy entry points

Framework for policy entry points

1. How do you want NEA findings to be *used*?
2. Who are the *institutions / stakeholders* that can support the use of NEA findings?
3. What are the *policy entry* points for integrating NEA findings?
4. What are the *key messages* for these policy entry points?

NEAs & policy entry points

Refer back to other NEA outputs

Breakout Rooms

*Identifying windows of opportunity
for NEAs & policy*

Step 1

How do you want
the NEA to be **used**
in policies /
decision-making
processes?
[Discuss & select one]

Step 2

Who are the key
stakeholders /
institutions that
support the use of
NEA findings?
[Discuss & select one]

Step 3

What are the **policy**
entry points /
windows of
opportunity to
include the NEA?
[Discuss & select one]

Step 1

How do you want the NEA to be **used** in policies / decision-making processes? [DISCUSS & SELECT ONE]

Think about how you want the NEA to be used. For example:

Do you want the NEA to be used by decision-makers in a specific sector or ministry? (i.e. agriculture, fisheries, tourism, local governments, etc.)

Who are some of the key stakeholders that were identified as potential users of the assessment?

Think back to your 'key policy questions' and if they were answered by your assessment. How can your now be used to address these policy questions?

Step 2

Who are the key stakeholders / institutions that can support the use of NEAs? [DISCUSS & SELECT ONE]

Who are the key stakeholders, institutions or organisations that can support the use of the NEA and its inclusion in decision-making processes?

Specific departments in government ministries? (i.e. Biodiversity department in Ministry of Environment; environmental departments in health ministries, etc.)

Leaders from local governments and IPLCs? (local leaders, district representatives, members of parliament, etc.)

Specific UN organisation country offices or focal points for international agreements?

Step 3

What are the policy entry points to promote the use of the NEA in decision-making? [DISCUSS & SELECT ONE]

Think about policy entry points (windows of opportunity) to promote the use of the NEA in decisions, planning & policy processes:

Do you want the NEA's findings to guide governmental planning processes? (i.e. NBSAPs for CBD, NDCs for UNFCCC, investment plans, national budgets, etc.)

Do you want the NEA to contribute to reporting processes? (i.e. national reporting on CBD, reporting on SDGs, corporate reporting on biodiversity impacts, etc.)

Do you want the NEA to contribute to new laws / policies that are currently under review?

Lessons Learned: Tranche I

Summary for Policymakers & Approving NEA Findings

National Ecosystem Assessment **COLOMBIA**

Lessons Learned Workshop – Session 5
July 28, 2021

El futuro
es de todos

Gobierno
de Colombia

UN environment
programme

WCMC

Supported by:

Federal Ministry for the
Environment, Nature Conservation,
Building and Nuclear Safety

based on a decision of the German Bundestag

Turning the assessment report into a Summary for Policy Makers (SPM)

Overarching goals / targets in the SPM →

- CoChairs, CLA, Editors-reviewers, LA (with experience in policy) and TSI
→ Analysis of all the key findings and definition of 4 key messages.
- Task force group – SPM (13 participants).
- Covid 19.

Making the SPM clear and comprehensive for policy makers →

- Experts with experience as a policy makers.
- Definition and explanation of key technical concepts.
- Advisory Group and IPBES National Committee.
- Key support from the Editor-reviewer and the communication office.

Securing approval of the NEA report and SPM

Independent Assessment → Validation (IPBES conceptual framework) and approval to present the documents.

- Advisory Group: Three meetings.
- IPBES National Committee: Two meetings.

Improvement of the documents, taking into account their comments and the CLA's final decisions

Regional and High level meetings →

- Main key messages.
- Launch.

Launching the NEA

Communication strategy →

- Twitter, Facebook, WhatsApp, Emails.
- Press release.

Launching the NEA

Virtual Launch → June 30, 9 am – 10 am COL.

https://www.youtube.com/watch?v=YUI3_3GhZdl&t=1401s

➤ Video

- Ana María Hernández (IPBES Chair), Shena García-Rangel UNEP-WCMC), Hernando García (Humboldt Director).

Launching the NEA

- **NEA Results** → CLA's and CoChairs (achievements and challenges).

- **Symbolic delivery of the NEA to the Minister of Environment.**

Next steps

- *NEA and SMP Graphic design*
- *SMP Printing*

- *NEA Incidence*

Thank you!

Country presentation - Vietnam

The Final Stages of National Ecosystem Assessments

NEA Lessons Learned Workshop within Support to
Developing Capacities to Address Science-Policy-Practice
Interface Project

28th July 2021

NEA Finalization

1. Receive comments/suggestions from different stakeholders and national experts for final drafts of the NEA report, SPM, and Communication strategy
2. Learn lessons, experience from the WCMC new guidance notes on communications and share and exchange information, experience in communication with relevant projects that are on going in Vietnam
3. Review and harmonize 6 chapters of NEA draft report avoiding overlapping contents from 6 chapters
4. Synthesize, complete and edit the final drafts of the NEA report, SPM; and Communication strategy in Aug to Sep 2021
5. Design, Format NEA report and others in end of Sep 2021
6. Submit NEA results to UNEP-WCMC in the end of Sep 2021
7. Print publications and communication in Oct-Nov 2021

Approval Process

1. A Scientific Advisory Council for approving the NEA report has been formulated. The Council's Chairman and 8 members have been selected and invited
2. Scientific council's members are leading experts on biodiversity and having a high expertise/experience in review/approval of national reports
3. Draft report will be sent to the Council members in end of Aug or early Sep 2021 for their review/validation or any comments requested to revise/amend, etc.
4. Final revise comments from the Council members
5. The Council meeting will be held in end of Sep 2021 for approval

NEA's Key Challenges and Lessons Learned

1. Existing framework on biodiversity is lack of regulations on ecosystem assessment
2. In Vietnam, except for the climate change scenario, only future scenarios for the socio-economic sector have been developed, while there are no future scenarios for the ecosystem and their services yet;
3. Lack of information and data. Data is not coincidental in different sources;
4. Lack of experience in assessment and financial resource for survey and checking data
5. Communication on public awareness
6. Stakeholders engagement: local/provincial stakeholders in important
7. NEA results need to be introduced in relevant policies

Policy Engagement

1. Consulted and advised an integration of NEA into Law on Environment Protection 2020; and National Strategy on Environment Protection to 2030 and with a vision to 2050 (under approval)
2. Actively consult and advise to integrate NEA results into the following policies that have been revising by Biodiversity and Nature Conservation Agency of Vietnam Environment Administration - VEA/MONRE
 - The National Strategy on Biodiversity conservation to 2030 and a vision to 2050;
 - The National Report on Biodiversity 2020;
 - The Master Plan on Biodiversity Conservation
3. Consult and advise on how to integrate NEA results into Provincial Master Plan on Socio-Economic Development

THANK YOU FOR
YOUR ATTENTION!

Next steps

Supporting NEA Partners

- Direct support from UNEP-WCMC, UNDP & UNESCO
- Tailored guidance & resources on approving assessments, SPMs, policy entry points and action plans for use of assessment findings.
- Support under BES-Net II in coordination with UNDP country offices

What's next?

A close-up photograph of a bird's head, focusing on its eye and the surrounding feathers. The feathers are a mix of green and brown, with fine details visible. The bird's eye is dark and prominent. The background is a soft, out-of-focus green.

Session 6 on Celebrating national
ecosystem assessments

➔ Thursday 29 July at 12pm BST

Thank you!
